

For Immediate Release**Dynamic Computer Corporation adds AiRISTA Wi-Fi to its RFID portfolio**

RFID Systems Integrator Dynamic Computer Corporation (DCC) is now offering AiRISTA Wi-Fi RTLS solutions. DCC provides a complete range of RFID technologies to help healthcare facilities improve patient care, reduce costs and minimize risks.

Farmington Hills, Mich., Sept. 15, 2009 – Dynamic Computer Corporation (DCC) has finalized a partnership agreement with AiRISTA to add Wi-Fi RTLS solutions to its RFID offerings.

Farida Ali, DCC President & CEO said: “We are proud to announce this addition to our portfolio, particularly for our health care customers looking to utilize their existing Wi-Fi infrastructures to include an RFID tracking system.”

The Premier Healthcare Alliance supplier is a single-source RFID systems integrator serving industries including health care, aerospace, defense, education, manufacturing and pharmaceuticals. DCC offers active, wired (IR-RF), wireless, Wi-Fi, passive and battery-assisted passive (BAP) RFID-integrated solutions to meet the unique needs of its customers.

“We're delighted to join forces with DCC to offer the industry's most comprehensive Track and Trace solutions in regions where DCC's reputation of customer service and support is already established,” said AiRISTA COO Frank Shirmo.

DCC has partnered with AiRISTA along with other leaders in RFID technology to ensure its customers can select from among the best systems in quality, functionality and value.

“Our business philosophy is to let the use case dictate the specific RFID technology rather than convincing customers that a particular solution is a one-size-fits-all fix for their business problem. We help our customers utilize RFID strategically to improve processes and reduce error in their operations.” said Ali.
